Address of Applicant :Department of Computer Science Engineering - Artificial Intelligence, Machine Learning, Data Science, Marwadi University, Rajkot - Morbi Road, Rajkot 360003 Gujarat, India. Rajkot -----

(57) Abstract :

A mobile device for rejuvenating diabetic patients, comprising a housing 101 coupled with multiple wheels 102, a data input module, input specifications related to a user's profile, medical prescription and desired goal to be achieved, an image sensing module 105 identify the user by matching image characteristics with the user's profile, a wearable band 106 embodied with a sensing module 105 to capture real time vital parameters of the user, a pre-post workout food preparation module, compare the user's medical prescription, real time vital parameters and desired goal with a pre-stored database and prepare a food diet based on the comparison, a blood glucose monitor 108 obtain real time glucose readings of the user, a smart glass 109 show different type of exercises to be performed, multiple robotic arms 110 support the user while performing the exercise.
