(57) Abstract :
A plantation and habitat control device for vegetative propagated crops, comprising a cuboidal body 101 equipped with a plurality of motorized wheels 102 to maneuver in a farm field, a storage chamber 103 to store a plurality of parent crops which are to be planted, a screw conveyor 104 to transfer the crops towards a processing chamber 105, a motorized cutter 106 to slice a partial segment of the crop to be sown within the farm field, a soil quality assessment module 107 via an articulated link 108 to contact with a ground surface of the field and determine real time soil condition, a fertilizer storage section 109 and water storage section 110 along with a plurality of valves 111 and pipes 112 to regulate flow of water and fertilizer, a robotic arm 113a with a digging unit 113b to sow the partial segment of crops.
